

MODERN GARDEN/ PLANTING MODERN

Our mid-century modern garden is truly up-to-date, utilizing regionally-appropriate plants and no lawn or sheered hedges. This modern garden demonstrates the concepts of water conservation, low maintenance and sustainability. Planting modern means using plants that require less water, less fertilizer, and produce less yard waste. The hardscape elements include re-purposed materials — a fence from recycled plastic bender board, a door turned into wall art by the garden designer's children, and recycled glass in the firepit and between stepping stones.
