

2018 DEL MAR FAIR EXHIBIT PLANT SALE

On Friday, July 6 from 9 a.m. to 12 p.m. there will be a sale of plants used in this year's SDHS Fair Garden Exhibit at the fairgrounds. Cost is wholesale less an additional 25%. If you are interested, please park in the main lot off of Jimmy Durante Blvd. and enter the garden exhibit area through the Human Resource Dept (like the Night at the Fair on June 11th). Refer to the plant descriptions in the accompanying document for photos and cultural requirements. Items marked "NSF" (Not for Sale) are loaned plants.

CALIFORNIA NATIVE PLANTS

Plant Number	Botanical Name	Common Name	Size of Container (in gal)	Number of Plants Available	Cost per Plant
C1	<i>Salvia leucophylla</i> 'Amethyst Bluff'	Amethyst Bluff Purple Sage	1	3	\$3.00
C2	<i>Lyonothamnus floribundus</i> ssp. <i>asplenifolius</i>	Fern-leaved Catalina Ironwood	15	3	\$34.00
C3	<i>Artemisia pycnocephala</i> 'David's Choice'	David's Choice Sagewort	5	1	\$13.00
C4	<i>Frangula californica</i> / <i>Rhamnus californica</i>	California Coffee Berry / California Buckthorn	15	1	\$39.00
C4	<i>Frangula californica</i> / <i>Rhamnus californica</i>	California Coffee Berry / California Buckthorn	5	4	\$14.00
C5	<i>Dudleya pulverulenta</i>	Chalk Dudleya / Chalk Liveforever	2	3	\$7.00
C6	<i>Erigeron glaucus</i> 'Sea Breeze'	Seaside Daisy	1	3	\$4.00
C7	<i>Erigeron glaucus</i> 'Wayne Roderick'	Wayne Roderick Seaside Daisy	1	3	\$4.00
C8	<i>Baccharis pilularis</i> 'Pigeon Point'	Dwarf Coyote Brush	1	3	\$3.00
C9	<i>Lessingia filaginifolia</i> 'Silver Carpet Beach Aster'	Silver Carpet Beach Aster	1	3	\$4.00
C10	<i>Verbena lilacina</i> 'De La Mina'	Cedros Island Verbena	1	3	\$4.00
C11	<i>Arctostaphylos refugioensis</i>	Refugio Manzanita	5	3	\$12.00
C12	<i>Ceanothus</i> 'Sierra Blue'	Sierra Blue Ceanothus	5	5	\$10.00
C13	<i>Adenostoma fasciculatum</i> 'Nicolas'	Prostrate Chamise	1	3	\$4.00
C14	<i>Trichostema lanatum</i>	Woolly Bluecurls	5	3	\$14.00
C15	<i>Ceanothus</i> 'Dark Star'	Dark Star Ceanothus	1	3	\$4.00
C16	<i>Oenothera cespitosa</i>	Tufted Evening Primrose	1	3	\$6.00
C17	<i>Penstemon heterophyllus</i> 'Margarita BOP'	Margarita BOP Penstemon	2	3	\$11.00
C18	<i>Mimulus species</i>	Monkey Flower	5	2	\$7.00

Plant Number	Botanical Name	Common Name	Size of Container (in gal)	Number of Plants Available	Cost per Plant
C19	<i>Eriodictyon crassifolium</i>	Thickleaf Yerba Santa	1	3	\$8.00
C20	<i>Arctostaphylos 'Bryd Hill'</i>	Byrd Hill Manzanita	15	3	\$47.00
C21	<i>Eriogonum giganteum</i>	St. Catherine's Lace			NSF
C22	<i>Arctostaphylos insularis 'Canyon Sparkle'</i>	Canyon Sparkles Manzanita / Island Manzanita	15	3	\$47.00
C23	<i>Muhlenbergia rigens</i>	Deergrass	5	9	\$7.00
C24	<i>Stachys bullata</i>	California Hedgenettle	1	3	\$3.00
C25	<i>Heuchera maxima 'Old La Rochette'</i>	Old la Rochette Coral Bells	1	6	\$4.00
C25	<i>Heuchera 'Wendy'</i>	Wendy Coral Bells	1	6	\$4.00
C25	<i>Heuchera maxima 'Canyon Pink'</i>	Canyon Pink Coral Bells	1	6	\$4.00
C26	<i>Ribes sanguineum</i>	Red-flowering Currant / Flowering Currant	1	3	\$4.00
C27	<i>Heuchera maxima 'Canyon Belle'</i>	Red Coral Bells	1	6	\$4.00
C28	<i>Heuchera 'Susanna'</i>	Susanna Coral Bells	1	6	\$4.00
C29	<i>Salvia clevelandii</i>	Cleveland Sage	5	3	\$4.00
C30	<i>Heteromeles arbutifolia</i>	Toyon / California Holly	5	3	\$9.00
C31	<i>Rhus ovata</i>	Sugar Bush / Sugar Sumac	5	1	\$11.00
C32	<i>Vitis californica 'Rogers Red'</i>	California Wild Grape	5	1	\$11.00

SUCCULENTS & CACTUS

Plant Number	Botanical Name	Common Name	Size of Container (in gal)	Number of Plants Available	Cost per Plant
S1	<i>Senecio haworthii</i>	Woolly Senecio	10"	6	\$9.00
S2	<i>Aeonium 'Silk Pinwheel'</i>	Silk Pinwheel	5	5	\$8.00
S3	<i>Echeveria species</i>	Echeveria	3	5	\$16.00
S4	<i>Aloe brevifolia</i>	Short-leaved Aloe			NSF
S5	<i>Aeonium 'Plum Petals'</i>	Plum Petals	5	1	\$8.00
S6	<i>Kalanchoe beharensis</i>	Velvet Elephant Ear			NSF
S7	<i>Senecio talinoides</i>	Blue Fingers / Blue Senecio / Blue Chalk Sticks			NSF
S8	<i>Crassula ovata 'Sunset'</i>	Hummel's Sunset / Golden Jade Tree			NSF
S9	<i>Agave americana 'Marginata'</i>	Variegated Century Plant			NSF
S10	<i>Aloe 'Blue Elf'</i>	Blue Elf Aloe	10"	12	\$3.00
S11	<i>Aeonium urbicum 'Salad Bowl'</i>	Salad Bowl Aeonium	5	3	\$8.00
S12	<i>Hesperaloe parviflora 'Brakelights'</i>	Mountain States Red Yucca / Redflower False Yucca	3	3	\$20.00
S13	<i>Aloe tomentosa</i>	Hairy Green Aloe			NSF

OTHER WATERWISE PLANTS

Plant Number	Botanical Name	Common Name	Size of Container (in gal)	Number of Plants Available	Cost per Plant
O1	<i>Lavandula stoechas</i>	Pink Lavender	2	5	\$6.00
O2	<i>Helianthus interspecific</i> <i>'Sunfinity' Sunflower</i>	Sunfinity Sunflower	2	Barrel container	\$17.00
O3	<i>Arbutus 'Marina'</i>	Marina Strawberry Tree			NSF
O4	<i>Juniperus scopulorum</i> <i>'Wichita Blue'</i>	Wichita Blue Juniper	15	3	\$36.00
O5	<i>Artemisia 'Powis Castle'</i>	Powis Castle Artemisia/Wormwood	5	6	\$7.00
O6	<i>Morus rubra 'Pendula'</i>	Weeping Mulberry			NSF
O7	<i>Lavatera species</i>	Rose mallow	2	3	\$11.00
O8	<i>Buddleja davidii 'Black Knight'</i>	Black Knight Butterfly Bush	5	3	\$11.00
O9	<i>Verbena bonariensis</i>	Purple Top Verbena	5	4	\$11.00
O10	<i>Olea europaea 'Mt. Royal'</i>	Mt. Royal Olive Tree			NSF
O11	<i>Cercidium-parkinsonia</i> <i>hybrid 'Desert Museum'</i>	Desert Museum Palo Verde			NSF
O12	<i>Buddleja davidii</i>	Butterfly Bush	5	3	\$7.00
O13	<i>Calylophus drummondii</i>	Sun Drops/Texas Primrose	1	9	\$6.00
O14	<i>Agastache Hybrid Blue Boa'</i>	Hummingbird Mint 'Blue Boa'	2	3	\$11.00
O15	<i>Kniphofia uvaria 'Candy Apple'</i>	Red Hot Poker 'Candy Apple'	2	3	\$11.00
O16	<i>Asclepius curassavica</i>	Tropical Butterfly Bush/Mexican Milkweed/ Blood Flower	2	3	\$11.00

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C1
Botanical Name:	<i>Salvia leucophylla</i> 'Amethyst Bluff'
Common Name:	Amethyst Bluff Purple Sage
Appearance:	Large native salvia with aromatic silvery foliage and 12" long vivid purple-pink flower spikes. Perfect choice for sunny slopes and banks where it can sprawl freely and provide some erosion control.
Plant Community:	Coastal Sage Scrub
Hardiness:	To 20-25°F
Exposure:	Full sun
Water Needs:	Naturalize (no summer water once established); 1-2× per month
Bloom Time:	Spring
Height x Spread:	6-10' × 10-15'
Wildlife:	Hummingbirds, Butterflies, Bees, Birds

CALIFORNIA NATIVE PLANTS

Photo reprinted from Las Pilitas Nursery (<http://www.laspilitas.com>)

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>)

Plant Number:	C2
Botanical Name:	<i>Lyonothamnus floribundus ssp. asplenifolius</i>
Common Name:	Fern-leaved Catalina Ironwood / Santa Cruz Island Ironwood
Appearance:	Rare, evergreen tree with fern-like leaves and dark peeling red bark, beautiful conifer shape, good in grove-stands, fast-grower. Produces considerable leaf litter which is useful as mulch but can bury small understory plants. Useful in the landscape for bank stabilization, hedges
Plant Community:	Coastal sage scrub, chaparral, woodland
Hardiness:	To 20-35°F
Exposure:	Full sun
Water Needs:	1× per month, no summer water once established
Bloom Time:	Spring, Summer (creamy, white flowers)
Height x Spread:	20'-50' × 12-24'
Wildlife:	Birds, insects

CALIFORNIA NATIVE PLANTS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from Tree of Life Nursery (californianativeplants.com) & San Marcos Growers (www.smgrowers.com)

Plant Number:	C3
Botanical Name:	<i>Artemisia pycnocephala</i> 'David's Choice'
Common Name:	David's Choice Sagewort
Appearance:	Dense, low-growing evergreen perennial with finely divided soft sliver-gray foliage. Yellow flowers grown on stems that rise out and away from plant. Does not grow well in hotter inland gardens as overhead irrigation may cause rot.
Plant Community:	Coastal sage scrub
Hardiness:	To 0°F
Exposure:	Full sun (best) to Part sun
Water Needs:	1-2× per month
Bloom Time:	Summer
Height x Spread:	1'-2' x 2-3'
Wildlife:	None listed

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>) and Calscape (calscape.org)

Plant Number:	C4
Botanical Name:	<i>Frangula californica</i> / <i>Rhamnus californica</i>
Common Name:	California Coffee Berry / California Buckthorn
Appearance:	Dense evergreen shrub with dark red branches. Attractive dark green leaves with reddish tinge. Plant prized for berries which turn red, then purple and finally black over summer. Easy to grow. Dense form that makes great fire-resistant hedge. Common landscape uses are bank stabilization, hedges, good in bird, butterfly and bee gardens.
Hardiness:	To <15°F
Plant Community:	Chaparral, woodland
Exposure:	Full sun, part shade
Water Needs:	1-2× per month
Bloom Time:	Spring, Summer (small greenish-white flowers)
Height x Spread:	6'-15' × 5'-15'
Wildlife:	Berries provide food source for birds. Butterflies, bees

CALIFORNIA NATIVE PLANTS

Photo reprinted from Calscape (calscape.org)

PLANT CHARACTERISTICS

Information from Calscape (calscape.org)

Plant Number:	C5
Botanical Name:	<i>Dudleya pulverulenta</i>
Common Name:	Chalk Dudleya / Chalk Liveforever
Appearance:	Succulent found in rocky areas. Rosette with wide fleshy leaves of pale green which age to a pinkish papery texture in drier summer months. In winter and spring it produces a number of tall erect pinkish white stems that produce numerous pointy, rosy-red flowers. Covered in dense coating of chalky, powdery wax. Plant at a 45-90° angle into rocky slopes or rock walls to allow water to fall off face of plant; if planted with face straight up, standing water will cause plant to rot.
Plant Community:	Coastal Sage Scrub, Chaparral
Hardiness:	To 20°F when mature
Exposure:	Full sun, Part shade
Water Needs:	Naturalize. 1× per month
Bloom Time:	Spring
Height x Spread:	<1'-1' x 1'
Wildlife:	Hummingbirds, butterflies

CALIFORNIA NATIVE PLANTS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C6
Botanical Name:	<i>Erigeron glaucus</i> 'Sea Breeze'
Common Name:	Seaside Daisy
Appearance:	Evergreen perennial that forms clumps with gray-green foliage with 3" wide lavender daisies with chartreuse to yellow centers.
Plant Community:	Coastal, Coastal Sage Scrub
Hardiness:	0-10° F
Exposure:	Full sun to light shade
Water Needs:	2× per month to 4× per month
Bloom Time:	Spring to Fall
Height x Spread:	<1' x 1'-2'
Wildlife:	Butterflies, bees

CALIFORNIA NATIVE PLANTS

Photo reprinted from Annie's Annuals (www.anniesannuals.com)

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C7
Botanical Name:	<i>Erigeron glaucus</i> 'Wayne Roderick'
Common Name:	Wayne Roderick Seaside Daisy
Appearance:	Evergreen perennial with large lavender-blue flowers. More heat tolerant than other <i>Erigeron glaucus</i> selections. Excellent for flower borders.
Plant Community:	Coastal, Coastal Sage Scrub
Hardiness:	To 0°F
Exposure:	Full sun to light shade
Water Needs:	2× per month to 4× per month
Bloom Time:	Spring/Summer
Height x Spread:	1' × 1-2'
Wildlife:	Butterfly, bees

CALIFORNIA NATIVE PLANTS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C8
Botanical Name:	<i>Baccharis pilularis</i> 'Pigeon Point'
Common Name:	Dwarf Coyote Brush
Appearance:	Low growing groundcover shrub with light green rounded leaves. Male flower selection which does not have the fluffy seed heads of other species. Plant 6' to 8' to create solid cover within 2-4 years; if planted closer will create a tighter, taller planting.
Plant Community:	Varied
Hardiness:	To 15-20°F
Exposure:	Full sun
Water Needs:	1-2× per month; occasional summer irrigation once established
Bloom Time:	Fall (insignificant flowers)
Height x Spread:	1-2' × 8-10'
Wildlife:	None listed

CALIFORNIA NATIVE PLANTS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C9
Botanical Name:	<i>Lessingia filaginifolia</i> 'Silver Carpet Beach Aster'
Common Name:	Silver Carpet Beach Aster
Appearance:	Low growing perennial that is densely clothed with toothed 1" long soft-spoon-shaped silvery-gray leaves. Attractive 1" wide lavender-pink, yellow-centered, daisy flowers. Excellent ground cover; looks great spilling over rocks or walls.
Plant Community:	Coastal, grasslands, coastal sage scrub, oak woodland
Hardiness:	To 15-20° F
Exposure:	Full sun to partial shade (does best in full sun; leggy in partial shade)
Water Needs:	Low water close to coast; occasional summer water inland
Bloom Time:	Late spring through summer into fall
Height x Spread:	<1' x 6-8'
Wildlife:	Butterflies

CALIFORNIA NATIVE PLANTS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C10
Botanical Name:	<i>Verbena lilacina</i> 'De La Mina'
Common Name:	Cedros Island Verbena
Appearance:	Tidy growing evergreen herbaceous subshrub with mounding habit of mid-green delicately dissected foliage and clusters of sweetly fragrant dark purple, star-shaped flowers.
Hardiness:	To 20-25°F
Plant Community:	Coastal Sage Scrub
Exposure:	Cool sun, Light Shade
Water Needs:	1-2× per month
Bloom Time:	Spring, Summer
Height x Spread:	1'-2' × 3'-4'
Wildlife:	Hummingbirds, Butterflies

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>) and Las Pilitas Nursery (www.laspilitas.com)

Plant Number:	C11
Botanical Name:	<i>Arctostaphylos refugioensis</i>
Common Name:	Refugio Manzanita
Appearance:	Rare large, lush, beautiful evergreen shrub with pearly white to pink flowers; new growth is flaming red. Excellent front yard shrub. Tolerates clay soil.
Hardiness:	To 15°F
Plant Community:	Chaparral
Exposure:	Full sun, part shade
Water Needs:	1× per month
Bloom Time:	Spring, Winter (flowers that become edible fruit)
Height x Spread:	6'-8' × 10'
Wildlife:	Great for bird garden (hummingbirds)

CALIFORNIA NATIVE PLANTS

Photo reprinted from Las Pilitas Nursery (www.laspilitas.com)

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>) and Moosa Creek Nursery (www.moosacreeknursery.com)

Plant Number:	C12
Botanical Name:	<i>Ceanothus 'Sierra Blue'</i>
Common Name:	Sierra Blue Ceanothus
Appearance:	Large, evergreen shrub with glossy, green leaves and vivid blue flowers. Exceptional fragrance, good as hedges/screens, and as slope stabilizer. Rapid grower; long lived. Best grown in full sun
Hardiness:	To 15°F
Plant Community:	Chaparral
Exposure:	Full sun
Water Needs:	1× per month
Bloom Time:	Spring (vivid blue flowers)
Height x Spread:	8'-15' × 10'+
Wildlife:	Flowers are attractive to butterflies, bees

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Theodore Payne Foundation (www.theodorepayne.org)

Plant Number:	C13
Botanical Name:	<i>Adenostoma fasciculatum</i> 'Nicolas'
Common Name:	Prostrate Chamise
Appearance:	Heather-like dark green foliage, with mounding and spreading habit.
Plant Community:	Chaparral
Hardiness:	To 15°F
Exposure:	Full sun; Part shade
Water Needs:	Naturalize (no summer water once established); 1× per month
Bloom Time:	Spring, Summer
Height x Spread:	1'-3' × 3-5'
Wildlife:	Butterflies, Birds

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Calscape (calscape.org)

Plant Number:	C14
Botanical Name:	<i>Trichostema lanatum</i>
Common Name:	Woolly Bluecurls
Appearance:	Highly fragrant, small evergreen shrub or sub-shrub with curly, woolly blue flowers in dense clusters with narrow, pointed green leaves.
Plant Community:	Chaparral, Coastal Sage Scrub
Hardiness:	To 0° F
Exposure:	Full sun, Part shade
Water Needs:	1× per month to no summer water once established
Bloom Time:	Spring, Fall, Winter
Height x Spread:	5' × 5'
Wildlife:	Hummingbirds, bees

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>)

Plant Number:	C15
Botanical Name:	<i>Ceanothus 'Dark Star'</i>
Common Name:	Dark Star Ceanothus
Appearance:	Mounding shrub with small leaves and profuse dark blue flowers
Plant Community:	Chaparral
Hardiness:	To 15°F
Exposure:	Full sun
Water Needs:	1-2× per month in summer
Bloom Time:	Spring
Height x Spread:	4'-8' × 8'-12'
Wildlife:	Bees, insects, birds

CALIFORNIA NATIVE PLANTS

Photo reprinted from Calscape (calscape.org)

PLANT CHARACTERISTICS

Information from Calscape (calscape.org) & USDA Forest Service (www.fs.fed.us)

Plant Number:	C16
Botanical Name:	<i>Oenothera cespitosa</i>
Common Name:	Tufted Evening Primrose / Fragrant Evening Primrose
Appearance:	Perennial plant that produces rosette of lobed or toothed leaves with 3-4" fragrant white flowers that bloom in the evening and close in mid-day heat. Flowers bloom and wilt the next day. Attracts large night-flying insects like the Hawk Moth and Sphinx Moth.
Plant Community:	Pinyon-Juniper Woodland, Riparian (rivers & creeks), Shadscale Scrub, Yellow Pine Forest
Hardiness:	To 20°F
Exposure:	Sun; Part shade
Water Needs:	Low water use to riparian cultural conditions
Bloom Time:	Summer; Fall
Height x Spread:	8" high
Wildlife:	Moths

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C17
Botanical Name:	<i>Penstemon heterophyllus</i> 'Margarita BOP'
Common Name:	Margarita BOP Penstemon
Appearance:	Semi-evergreen mounding perennial with short linear leaves with lavender to purple flowers.
Hardiness:	0-10°F
Plant Community:	Chaparral, Grassland, Oak Forest, Forest
Exposure:	Full sun
Water Needs:	1-2× per month
Bloom Time:	Summer
Height x Spread:	18" x 28"-30"
Wildlife:	Hummingbirds, Bees

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>)

Plant Number:	C18
Botanical Name:	<i>Mimulus species</i>
Common Name:	Monkey Flower
Appearance:	Flowers are named for their funny-face flowers that look like grinning monkeys. Wood sub-shrub, sticky, light green leaves, profuse blooms.
Hardiness:	To 20-25°F
Plant Community:	Chaparral, Coastal Sage Scrub
Exposure:	Full sun, Part shade
Water Needs:	Naturalize; 1× per month
Bloom Time:	Spring
Height x Spread:	2' × 3'
Wildlife:	Hummingbirds, Bees

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Calscape (calscape.org)

Plant Number:	C19
Botanical Name:	<i>Eriodictyon crassifolium</i>
Common Name:	Thickleaf Yerba Santa
Appearance:	Rounded shrub with hairy to woolly stems with leaves that have toothed margins. Lavender bell-shaped flowers that cluster at the top of upright stems. Endemic to Southern California.
Plant Community:	Chaparral
Hardiness:	To 33°F
Exposure:	Full sun
Water Needs:	Naturalize (no summer water once established); 1× per month
Bloom Time:	Spring
Height x Spread:	3-10' × 3-6'
Wildlife:	Hummingbirds, Butterflies, Bees

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>)

Plant Number:	C20
Botanical Name:	<i>Arctostaphylos 'Byrd Hill'</i>
Common Name:	Byrd Hill Manzanita
Appearance:	A woody evergreen shrub with an upright, treelike growth habit. Branches are crooked and sculptural with exfoliating red bark. Gray-green leaves are rounded to egg-shaped. Clusters of pink, drooping, urn-shaped flowers are beneficial to many bird species. The berries are edible.
Hardiness:	To 15°F
Plant Community:	Varied
Exposure:	Full sun
Water Needs:	1-2× per month
Bloom Time:	Spring
Height x Spread:	8'-10' × 8'
Wildlife:	Hummingbirds, Birds, Butterflies

Plant Number:	C21
Botanical Name:	<i>Eriogonum giganteum</i>
Common Name:	St. Catherine's Lace
Appearance:	Evergreen shrub with gray foliage that is a large buckwheat with pinkish-white flowers fading to rust red. Good background plant or placed in the center of a border.
Hardiness:	To 20-25°F
Plant Community:	Chaparral, Coastal Sage Scrub
Exposure:	Full sun
Water Needs:	1-2× per month
Bloom Time:	Spring, Fall
Height x Spread:	4'-8' × 6'-8'
Wildlife:	Butterflies, Bees, Insects, Birds eat seed heads

Plant Number:	C22
Botanical Name:	<i>Arctostaphylos insularis</i> 'Canyon Sparkle'
Common Name:	Canyon Sparkles Manzanita / Island Manzanita
Appearance:	Medium size shrub, with very glossy bright green leaves, green stems and red bark. Does well in clay or sandy soils. Good for hedges, borders in the landscape.
Hardiness:	To -5°F
Plant Community:	Chaparral, Coastal Sage Scrub
Exposure:	Part shade, full shade
Water Needs:	2× per month
Bloom Time:	Winter (white bell-shaped flowers which become edible fruit)
Height x Spread:	4' × 6'
Wildlife:	Hummingbirds, Birds, Butterflies

PLANT CHARACTERISTICS

Information from Calscape (calscape.org)

Plant Number:	C24
Botanical Name:	<i>Stachys bullata</i>
Common Name:	California Hedgenettle
Appearance:	Perennial herb with delicate lavender flowers that performs well in damp areas. Grows well in wet, swampy, boggy places. Good choice for bioswales, pond margins. Like most wetland plants, it spreads but is easily controlled.
Plant Community:	Coastal strip
Hardiness:	To 15°F
Exposure:	Partial shade
Water Needs:	2× per week; keep moist
Bloom Time:	Spring, Summer, Fall
Height x Spread:	1' × 2'
Wildlife:	Hummingbirds, butterflies, bees

CALIFORNIA NATIVE PLANTS

Plant Number:	C25
Botanical Name:	<i>Heuchera maxima</i> 'Old La Rochette'
Common Name:	Old la Rochette Coral Bells
Appearance:	Wonderful, often hard to find Heuchera hybrid. Grows in robust clumps of rounded leaves with wavy margins whose flower stalks carry hundreds of soft pink blossoms.
Plant Community:	Varied
Hardiness:	To 15°F
Exposure:	Part shade, Full shade
Water Needs:	2× per month; drought tolerant once established
Bloom Time:	Spring, Summer
Height x Spread:	1' × 1-2'
Wildlife:	Hummingbirds, bees, butterflies

PLANT CHARACTERISTICS

Information from Calscape (calscape.org)

Plant Number:	C26
Botanical Name:	<i>Ribes sanguineum</i>
Common Name:	Red-flowering Currant / Flowering Currant
Appearance:	Deciduous shrub with dark-brownish-gray bark and 1"-3" long/broad leaves. Young plants have a strong resinous scent in spring. Flowers are produced in early spring when leaves emerge on racemes (flower cluster with separate flowers attached on short stalk) of 5-30 flowers with red or pink petals. Fruit is dark purple and beloved by birds.
Plant Community:	Chaparral, Forest, Woodland
Hardiness:	To 11°F
Exposure:	Part shade
Water Needs:	2-3× per month
Bloom Time:	Spring (flowers); Winter (berries)
Height x Spread:	6.5-13' × 7'
Wildlife:	Hummingbirds, Birds

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C27
Botanical Name:	<i>Heuchera maxima</i> 'Canyon Belle'
Common Name:	Red Coral Bells
Appearance:	Small perennial mounding plant with wide small, glossy dark green 2" wide leaves. Stems are 18" red-tinged stems of rich red flowers held high above foliage. Can be grown in full sun in coastal yards.
Plant Community:	Varied
Hardiness:	0-10°F
Exposure:	Part shade, Light shade
Water Needs:	2× per month; drought tolerant once established
Bloom Time:	Spring
Height x Spread:	<1' x <1'
Wildlife:	Hummingbirds, bees, butterflies

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	C28
Botanical Name:	<i>Heuchera 'Susanna'</i>
Common Name:	Susanna Coral Bells
Appearance:	Perennial with bright green leaves with pinkish red flowers held on 2' stalks. Can be grown in full sun on coast.
Plant Community:	Varied
Hardiness:	To 25°F
Exposure:	Part shade, Light shade
Water Needs:	2× per month; drought tolerant once established
Bloom Time:	Spring, summer
Height x Spread:	<1' x 1'
Wildlife:	Hummingbirds, bees, butterflies

CALIFORNIA NATIVE PLANTS

PLANT CHARACTERISTICS

Information from Calscape (calscape.org)

Plant Number:	C29
Botanical Name:	<i>Salvia clevelandii</i>
Common Name:	Cleveland Sage
Appearance:	Beautiful, fast growing, highly aromatic sage with wrinkly leather-textured leaves with rounded flower clusters of tubular lavender to dark purple flowers that are very attractive to hummingbirds.
Plant Community:	Chaparral, Coastal Sage Scrub
Hardiness:	To 20°F
Exposure:	Sun; Part shade
Water Needs:	Limit water use to no more than 1× per month and naturalize after 1 st or 2 nd year. If given too much water, it may die after 2-3 years.
Bloom Time:	Spring, Summer
Height x Spread:	3'-4' × 8'
Wildlife:	Hummingbirds, insects

Plant Number:	C30
Botanical Name:	<i>Heteromeles arbutifolia</i>
Common Name:	Toyon / California Holly
Appearance:	Large evergreen shrub with dark green leaves, white flowers and showy red berry clusters.
Hardiness:	0-10°F
Plant Community:	Chaparral
Exposure:	Full sun, Part shade
Water Needs:	Naturalize; 1× per month
Bloom Time:	Summer
Height x Spread:	8'-15' × 15
Wildlife:	Birds, Butterflies

CALIFORNIA NATIVE PLANTS

Photo reprinted from Calscape (calscape.org)

PLANT CHARACTERISTICS

Information from Calscape (calscape.org)

Plant Number:	C31
Botanical Name:	<i>Rhus ovata</i>
Common Name:	Sugar Bush / Sugar Sumac
Appearance:	Evergreen shrub to small tree with rounded appearance, often growing wider than tall. Twigs are thick and reddish in color with dark green, leathery, ovate leaves. Flowers cluster at the ends of branches, with small white to pink flowers. Fruit is small, reddish that is edible. Fast growing once established. Great slope stabilizer. Tolerates variety of soils. Said to be fire resistant given supplemental water.
Plant Community:	Chaparral, coastal sage scrub, to mountains and desert transition
Hardiness:	To +10°F (from Tree of Life Nursery – californianativeplants.com)
Exposure:	Sun, part shade
Water Needs:	1× per month in summer; shouldn't need watering once established
Bloom Time:	Spring, Winter
Height x Spread:	6'-32' × 30'
Wildlife:	Insects, birds

PLANT CHARACTERISTICS

Information from Tree of Live Nursery (<http://californianativeplants.com>) and Moosa Creek Nursery (www.moosacreeknursery.com)

Plant Number:	C32
Botanical Name:	<i>Vitis californica</i> 'Rogers Red'
Common Name:	California Wild Grape
Appearance:	Vigorous winter deciduous vine with beautiful flaming red fall color. Tasty blue fruit. Great for covering arbors, walls, fences (e.g., chain-link fence). If not given a support to grow over, it will become a mounding, spreading groundcover
Hardiness:	To 15°F
Plant Community:	Varied
Exposure:	Sun, part shade, full shade
Water Needs:	2× to 4× per month
Bloom Time:	Spring (pale yellow flowers)
Height x Spread:	25'-40' × 40'+ (climber)
Wildlife:	Fruit prized by birds; flowers attract butterflies, bees, wasps

SUCCULENTS & CACTUS

Photo reprinted from World of Succulents (<https://worldofsucculents.com>)

PLANT CHARACTERISTICS

Information from World of Succulents (<https://worldofsucculents.com>)

Plant Number:	S1
Botanical Name:	<i>Senecio haworthii</i>
Common Name:	Woolly Senecio
Appearance:	Perennial dwarf succulent shrub with upright cylindrical succulent leaves covered in pure white, very fine hairs covering all surfaces. Produces bright yellow flowers. Try not to wet foliage when watering.
Hardiness:	To 25-30°F
Exposure:	Full sun
Water Needs:	Low water; allow soil to dry between watering
Bloom Time:	Infrequent
Height x Spread:	1' x 1'-2'
Wildlife:	Bees, beneficial insects, birds, butterflies, moths

SUCCULENTS & CACTUS

PLANT CHARACTERISTICS

Information from Waterwise Botanicals (<https://www.waterwisebotanicals.com>)

Plant Number:	S2
Botanical Name:	<i>Aeonium 'Silk Pinwheel'</i>
Common Name:	Silk Pinwheel
Appearance:	Dusky, dark purple succulent leaves are arranged in tight whorls with texture and color reminiscent of fine silk. More compact with denser rosettes than other <i>Aeonium</i> arboreums.
Hardiness:	To 28°F
Exposure:	Full sun or part shade
Water Needs:	Low water; use less water during the summer dormant season.
Bloom Time:	Infrequent
Height x Spread:	3' x 3'
Wildlife:	Bees

SUCCULENTS & CACTUS

Photo reprinted from World of Succulents (<https://worldofsucculents.com>)

PLANT CHARACTERISTICS

Information from World of Succulents (<https://worldofsucculents.com>)

Plant Number:	S3
Botanical Name:	<i>Echeveria species</i>
Appearance:	Usually solitary succulent plant with rosettes to 12" across. Never let water sit in rosette which will cause rot or fungal diseases. Colors range from blue-green to gray-green tinged rose around wavy edges. Remove dead leaves from bottom as plant grows. Colors more pronounced when grown in sun.
Hardiness:	25-30°F
Exposure:	Cool sun; Light shade
Water Needs:	Low water use
Bloom Time:	Summer
Height x Spread:	1' x <1'
Wildlife:	Hummingbirds, bees

SUCCULENTS & CACTUS

PLANT CHARACTERISTICS

Information from World of Succulents (<https://worldofsucculents.com>)

Plant Number:	S4
Botanical Name:	<i>Aloe brevifolia</i>
Common Name:	Short-leaved Aloe
Appearance:	Rosette-forming succulent with triangular, thick gray-green leaves with white spines along margins that build up on each other to form a clump.
Hardiness:	To 25-30°F
Exposure:	Full sun
Water Needs:	Low. Never let plant stand in stagnant water. Use well draining cactus potting mix if growing in pots, or plant outdoors in well draining soil.
Bloom Time:	Late spring (orange tubular flower spikes that rise up to 24" above plant)
Height x Spread:	1'-2' x 1'-2'
Wildlife:	Hummingbirds

SUCCULENTS & CACTUS

Plant Number:	S5
Botanical Name:	<i>Aeonium 'Plum Petals'</i>
Common Name:	Plum Petals
Appearance:	Deep, plum-purple colored succulent leaves forming large rosettes up to 10" across. Freely branching. Active during cool season, let rest during hottest summer months.
Hardiness:	To 30°F
Exposure:	Full sun or part shade
Water Needs:	Low water; can accept regular garden watering.
Bloom Time:	Yellow flowers during Spring to Summer
Height x Spread:	3.5' x 3'
Wildlife:	Bees

SUCCULENTS & CACTUS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	S6
Botanical Name:	<i>Kalanchoe beharensis</i>
Common Name:	Velvet Elephant Ear
Appearance:	Slow growing succulent tree-like shrub with thick stems and large, undulated and folded, olive-green, slightly triangular-shaped leaves covered in velvety soft brown hairs. When mature, small, greenish-yellow flowers appear. Good sculptural succulent that looks great in large pot.
Hardiness:	To 30-32°
Exposure:	Sun or shade
Water Needs:	Low water needs; allow soil to dry out between watering
Bloom Time:	Winter
Height x Spread:	10'-16' x 6'-12'
Caution:	May be poisonous

SUCCULENTS & CACTUS

Plant Number:	S7
Botanical Name:	<i>Senecio talinoides</i>
Common Name:	Blue Fingers / Blue Senecio / Blue Chalk Sticks
Appearance:	Evergreen semi-trailing succulent shrub with sparingly branched, erect, becoming procumbent and often rooting at nodes. Fleshy finger-like leaves that are brittle. Use as groundcover.
Hardiness:	To 20-25°F
Exposure:	Full sun
Water Needs:	Low water needs
Bloom Time:	Summer (small white flowers)
Height x Spread:	1'-5' x 2'-3'
Wildlife:	Bees, butterflies, other insects

SUCCULENTS & CACTUS

Photo reprinted World of Succulents (<https://worldofsucculents.com>)

Photo reprinted San Marcos Growers (www.sanmarcosgrowers.com)

PLANT CHARACTERISTICS

Information from World of Succulents (<https://worldofsucculents.com>)

Plant Number:	S8
Botanical Name:	<i>Crassula ovata</i> 'Sunset'
Common Name:	Hummel's Sunset / Golden Jade Tree
Appearance:	Shrubby succulent with leaves the same size as the common Jade Plant (<i>Crassula ovata</i>) which take on spectacular hues with the upper portion of the leaves having a golden yellow color with ochre edges, especially during the cooler months. Received the prestigious Royal Horticultural Society (United Kingdom) Award of Garden Merit in 1993.
Hardiness:	To 32°F
Exposure:	Sun or part shade
Water Needs:	Low water needs
Bloom Time:	Late fall to winter (small white flowers with hint of lavender)
Height x Spread:	1'-3' x 1'-2'
Wildlife:	Bees

SUCCULENTS & CACTUS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from World of Succulents (<https://worldofsucculents.com>)
and San Marcos Growers (www.smgrowers.com)

Plant Number:	S9
Botanical Name:	<i>Agave americana</i> 'Marginata'
Common Name:	Variegated Century Plant
Appearance:	Large rosette-forming succulent with upright slightly waving gray-green leaves up to 5' long and 10" wide with strong cream to yellow margins. Flowers with tall inflorescence paniculate that are pale yellow. Slow growing. Give plenty of room and situate away from traffic; good for hillsides. CAUTION: Plant has irritating sap and very sharp thorns; plant away from walkways.
Hardiness:	To 15-20°F
Exposure:	Full sun
Water Needs:	Irrigate occasionally to not at all
Bloom Time:	Blooms after several decades old with yellow-green flowers
Height x Spread:	4'-6' x 6'-8'
Wildlife:	Hummingbirds

SUCCULENTS & CACTUS

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	S10
Botanical Name:	<i>Aloe 'Blue Elf'</i>
Common Name:	Blue Elf Aloe
Appearance:	Vigorous tight-clumping allow with narrow upright gray-blue leaves that contrast with spikes of orange flowers. Great in mass plantings as a succulent ground cover or as a potted specimen
Hardiness:	To 20-25°F
Exposure:	Full sun to light shade; will grow in deep shade but more prostrate and does not flower. Grows well in full sun in desert heat.
Water Needs:	Occasional to infrequent watering
Bloom Time:	Winter to early Spring
Height x Spread:	1'-2' x 1'-2'
Wildlife:	Hummingbirds

SUCCULENTS & CACTUS

PLANT CHARACTERISTICS

Information from Waterwise Botanicals (<https://www.waterwisebotanicals.com>)

Plant Number:	S11
Botanical Name:	<i>Aeonium urbicum</i> 'Salad Bowl'
Common Name:	Salad Bowl Aeonium
Appearance:	Huge green succulent rosettes up to 18" across making it look like a giant salad bowl.
Hardiness:	To 30°F
Exposure:	Full sun; Part shade (esp. inland)
Water Needs:	Low water use; rests during summer so reduce watering.
Bloom Time:	Winter to early Spring with cream flower spikes
Height x Spread:	1.5' x 3'
Wildlife:	Bees

SUCCULENTS & CACTUS

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	S12
Botanical Name:	CALIFORNIA NATIVE: <i>Hesperaloe parviflora</i> 'Brakelights'
Common Name:	Mountain States Red Yucca / Redflower False Yucca
Appearance:	A stemless succulent with rosettes of arching and spreading grass-like foliage to 2' tall with vibrant red colored bell-shaped flowers rising on arching wands to 3'. The leathery, long, narrow, blue-green leaves have white fraying fibers along margins.
Plant Community:	Desert
Hardiness:	<0°F
Exposure:	Full sun
Water Needs:	1-2× per month; will accept no irrigation in summer once established but will flower better with some irrigation
Bloom Time:	Spring, Summer
Height x Spread:	2-3' × 2-3'
Wildlife:	Hummingbirds, bees

Plant Number:	O2
Botanical Name:	<i>Helianthus interspecific 'Sunfinity' Sunflower</i>
Common Name:	Sunfinity Sunflower
Appearance:	Long-lasting bright yellow sunflowers. Up to 12 weeks of blooming color.
Hardiness:	To 65-68°F
Exposure:	Full sun
Water Needs:	Medium water use
Bloom Time:	Summer to Autumn
Height x Spread:	36"-48" x 24"-36"
Wildlife:	Butterflies, Bees

OTHER WATERWISE PLANTS

Photo reprinted from San Marcos Growers (www.smgrowers.com)

PLANT CHARACTERISTICS

Information from San Marcos Growers (www.smgrowers.com)

Plant Number:	O3
Botanical Name:	<i>Arbutus 'Marina'</i>
Common Name:	Marina Strawberry Tree
Appearance:	The tree's growth causes the older bark to peel away from the trunk and branches revealing the beautiful shiny red new bark underneath. The pendulous clusters of urn-shaped white-blushed-pink flowers are produced year-round along the coast with peaks in spring and fall. The flowers are followed by red gritty fruit that while technically edible, are not really that palatable. Can be grown as a standard or as a multi-branched tree.
Hardiness:	To 15-20°F
Exposure:	Full sun
Water Needs:	Low water use; looks best with summer water
Bloom Time:	Year round
Height x Spread:	40'-50' × 25'-40'
Wildlife:	Hummingbirds, Bees, Birds (fruit)

PLANT CHARACTERISTICS

Information from Annie's Annuals (www.anniesannuals.com)

Plant Number:	O16
Botanical Name:	<i>Asclepius curassavica</i>
Common Name:	Tropical Butterfly Bush / Mexican Milkweed / Blood Flower
Appearance:	Rich nectar source and critical larval food source for Monarch butterflies. Evergreen, shrubby plant with bold red-orange and yellow flowers that bloom throughout the year. Reseeds. Aphids attracted to new growth. To protect Monarchs from disease, cut back in late Fall which will promote a healthier plant next year. Milky sap may cause minor skin irritation; use caution when cutting plant stems.
Hardiness:	To 10-15°F
Exposure:	Full sun
Water Needs:	Low water
Bloom Time:	Year-round
Height x Spread:	4' x 4'
Wildlife:	Butterflies, bees
